

WNV - Cumulative Horse Summary by County and Municipality 2003

Massachusetts Arbovirus Surveillance-- Equines

Last updated: January 8, 2004

In Massachusetts, a total of eight equine cases of WNV were detected in eight counties in 2003. In addition, five EEEV positive equine cases from three counties were reported. The WNV positive horse from Windsor in Berkshire county is believed to have contracted its infection outside of Massachusetts.
